viztrick AiDi⁺

Intuitive On-Device AI Solution

1. No Internet Required AI Technology

An innovative new system that automates and simplifies broadcast operations in real time using a single PC.

2. Ease of Use & Creative Power

Refined through practical production experience, offering intuitive operation and creative freedom using broadcast-quality graphic technology.

3. Machine Learning from Vast Video & Audio Data

High-precision processing achieved through the analysis of broadcast archives.

* Viztrick AiDi, provided in collaboration with Nippon TV

System Overview

①Mode Switch ②User Interface ③Settings ④Output Format ⑤Tool Pallet ⑥Tool Details ⑦Action Controls

Operation screen of an LCD pen tablet

2D Video Pen (For Soccer/Football and Baseball)

- **Brush** : Draw freehand lines on the screen
- **Arrow** : Draw arrowed lines on the screen
- **Number** : Display circled numbers on the screen

Pen tablet operation

Video output

On-screen graphics remain in place even while the camera pans.

Soccer/Football

2.5D Ground Drawing (For Soccer/Football)

- **Brush** : Draw freehand lines on the field display
- **Arrow** : Draw arrowed lines on the field display

With AI field recognition, pen-drawn graphics on the tablet are overlaid onto the video and stay fixed to the field even during camera movements.

Video output

- **Player Track** : Displays a circular or rectangular marker at the player's feet

Pen tablet operation

Video output

AI technology recognizes each player. Simply tap a player with the pen to instantly display a circular or rectangular marker at their feet, which tracks their movements in real time.

Motion Data (For Soccer/Football)

• Player Speed : Player speed display

The AI technology recognizes both the field and each player. Simply tap a player on the tablet to display and automatically track their speed.

• Player Distance : Distance between players

The AI technology recognizes both the field and each player. Simply tap two players on the tablet to display and automatically track the distance between them, along with a connecting line.

• Distance & Angle : Distance & angle display

Pen and tablet operation

Video output

The AI technology recognizes the field. Simply tap two points (A and B) on the tablet to display the distance and angle between them.

Other Features (For Soccer/Football)

• Face Tagging : Recognizes players from video and displays their profile

Based on AI face recognition, the system instantly suggests a profile graphic. Player face information and profiles can be pre-registered or registered on-site. * Once finalized, design remains set for future use.

Baseball

2.5D Ground Drawing (For Baseball)

- **Brush** : Draw freehand lines on the field display
- **Arrow** : Draw arrowed lines on the field display

With AI field recognition, pen-drawn graphics on the tablet are overlaid onto the video and stay fixed to the field even during camera movements.

• Player Track :

Displays a circular or rectangular marker at the player's feet

AI technology recognizes each player. Simply tap a player on the tablet to instantly display a circular or rectangular marker at their feet, which then tracks their movements in real time.

Motion Data (For Baseball)

• Player Speed : Player speed display

The AI technology recognizes both the field and each player. Simply tap a player on the tablet to display and automatically track their speed.

• Player Distance : Distance between players

The AI technology recognizes both the field and each player. Simply tap two players on the tablet to display and automatically track the distance between them, along with a connecting line.

Other Features (For Baseball)

- **Auto Score Graphics** : Creating graphics from score data

Scoreboard Data

Graphics Added

Pen tablet operation

Video output

Pen tablet operation

Video output

Simply select the part of the scoreboard or image you want to display, and AI technology automatically generates the score graphic.

- **Face Tagging** : Recognizes players from video and displays their profiles

Pre-Registration with Player Photos

On-Site Registration

Based on AI face recognition, the system instantly suggests a profile graphic. Player face information and profiles can be pre-registered or registered on-site. * Design is set for future use.

Upcoming Features

3D Graphics

Ball Trajectory Display

Upcoming options

Automated Broadcast Production

Golf Ball Tracking
(with Sensors)
