Visit the FOR-A website, register your email address and download manuals and other documents from the FA-9500 page: https://www.for-a.com/

1. Rear Connectors

- **AC Power connector 1**
- **HD/SD-SDI input connector 1, 2**
- **HD/SD-SDI output connector 1, 2**
- **Genlock input connector**
- **Reference signal input connector**
- **Audio component input connector**
- **Audio component output connector**
- **Ethernet port (for future use)**
- **Digital audio input/output connectors**

2. Installing the AC Cord Retaining Clip

After connecting the AC cord, secure the AC cord with the supplied ladder strap/retaining clip assembly to prevent accidental removal from the FA-9500. Be sure to install the AC cord retaining clip before mounting the unit into a rack.

1. Wrap the retaining clip around the AC cord. (with the anchor of the ladder strap toward the unit.)
2. Insert the anchor into the hole next to the AC IN socket.
3. Lightly fasten the clip around the AC cord.
4. Plug in the power cord.
5. Slide the clip on the ladder strap toward the plug.
6. Fasten the clip tightly.
7. Gently pull on the AC cord to ensure it is secured.

3. Front Operation Panel

- **POWER switch**: Pressing the ‘*’ or ‘+’ side turns on the power.
- **LOCK button**: Press and hold down to lock the front panel operation. Press and hold down again to unlock.
- **BY-PASS button**: Bypasses input signals (video and audio). The input signals are directly output when the BY-PASS button is pressed (lit).
- **EVENT button**: Used to save and load events.

4. Connecting a Computer

- **Connection using a hub**: Direct connection using a crossover LAN cable is also possible.

The FA-9500 network settings must be adjusted for your network after purchase.
- Set the IP address and subnet mask of the computer as follows:
  - IP address: 192.168.0.1 to 192.168.0.254 (except 192.168.0.10)
  - Subnet mask: 255.255.255.0

In Windows, open the Internet Protocol (TCP/IP) Properties window. The network settings must be made in the window. See the user's manual for your computer for details.

5. Connecting via a WEB Browser

Open a web browser on your computer, and enter the address as http://192.168.0.10/ (factory default setting) in the address bar.

Press the [Enter] key to connect to the FA-9500.

The login page is displayed.

Click Login.

The authentication dialog appears.

Enter your user name and password. (The default user name and password are set at the factory.)

- **User name**: fa9500
- **Password**: foranetwork

* Complete connections before turning the power of the unit on.

6. Menu Display

7. Menu List

8. Menu Operation

9. Resetting to Default

The UNITY indicator light goes off when the setting value is changed from the default value. Pressing the UNITY button while the light is off returns the corresponding setting value to the default value. Then the light goes off. Pressing the button again returns the value to the previous value before resetting to the default value.

* The above procedure is in NORMAL mode. Normally the unit starts up in NORMAL mode. There is another mode called LIVE SAFE mode, in which some menus request a setting change confirmation to protect important settings from accidental changes. If the unit is in LIVE SAFE mode, see sec. 4-2-1. "Resetting to Default" in the FA-9500 User Manual.

Press the UNITY button to reset the value. The indicator lights up orange.

8. Menu Operation

- Single arrow button
  Moves to the next menu.
  Lights if a menu is accessible. Goes off if no menu is accessible.
  Also used to move to the next menu item in a menu page.

- Double-arrow button
  Jumps to the first menu corresponding to each menu button.

- F1 to F4
  Changes corresponding line menu parameters.

1. Select VIDEO or AUDIO by the VIDEO/AUDIO button.

Every press of the VIDEO/AUDIO button alternates the menu button assignments between video and audio menus. The button indicators light green when the buttons are accessible to video menus that are indicated on the top row of each menu button. They light orange when they are accessible to audio menus that are indicated on the bottom row of each menu button.

- Press a menu button to select a menu group that includes the desired menu.

- Move to the desired menu using double arrow and/or single arrow buttons.

Single-arrow buttons allow you to move between menus if the selected menu button has multi-menu pages in the category. The single-arrow button lights up when there are more menus to be accessed in the direction. If the single-arrow button is unlit, the direction is not accessible.

Double-arrow buttons allow you to return to the menu indicated with ① in the menu list.

- F1 to F4 control knobs allow you to change the value of respective lines. Turn the operative control knob of an LED that is lit to change the value.

9. Resetting to Default

The UNITY indicator light goes off when the setting value is changed from the default value. Pressing the UNITY button while the light is off returns the corresponding setting value to the default value. Then the light goes off. Pressing the button again returns the value to the previous value before resetting to the default value.

<Comments on the menu list>

- Can be navigated using double (up and down) arrow buttons. "○" is not shown in the menu display.

- When settings in menus shown with a black circle (●) are changed in LIVE SAFE mode, single (up and down) arrow buttons and the LED around the control knob of which setting is changed blink confirming the setting change.

- To set the FA-9500 to LIVE SAFE mode, change the mode setting referring to section 7-3. "FRONT OPERATION".

Precautions
- Operate the unit only at the specified supply voltage.
- Ensure the unit is properly grounded at all times.
- Ensure the power cord and connectors are firmly connected.
- Do not access circuitry with power applied to the unit.
- Unit should not be operated or stored with the cover, panel, and/or casing removed.
- Unit should not be operated or stored in a humid, dusty, etc. environment. Do so could result in fire or electrical shock.
- Do not allow fluids, metal fragments, or any other foreign objects to enter the unit. If foreign matter does enter the unit, the power off immediately, turn off the power switch, disconnect the power cord, then contact your authorized service representative.
- If you notice any strange smells or noises coming from the unit, turn the power off immediately, turn off the power switch, disconnect the power cord, then contact your authorized service representative.
