Upon Receipt

The HVS-49IO expansion card allows you to add 16-input / 8-output of HD-SDI, an HDMI output and 2 additional MELites to the HVS-490 switcher.

HVS-49IO expansion cards are fully inspected and adjusted prior to shipment. Check your received items against the packing list below. Check to ensure no damage has occurred during shipment. If damage has occurred, or items are missing, inform your supplier immediately.

1. Installing HVS-49IO

1. Turn off the power supply to the HVS-490 and unplug the power supply cord.
2. Remove blank plate covering HVS-49IO SLOT by releasing two screws.

3. Position the card between the guide rails of the slot and insert the card into the slot.

   IMPORTANT
   - Do not force the card into the slot.
   - When inserting, be sure that the card is firmly positioned between the guide rails and not tilted.

4. Make sure that the card is inserted correctly and tighten both screws on the rear panel.
2. Verifying Installation

Check the STATUS menu to verify that the I/O card you have installed into the slot is properly recognized.

1. Plug the power supply cord and turn on the HVS-490.
2. Open STATUS tab and tap the OPTION button in control panel menu.
3. Verify that “INSTALLED” is indicated next to HVS-49IO.
