

# Insight C-Series

Insight Production C-Series units C2 and C4 offer a comprehensive solution for small and medium production facilities, offering two and four channels independently configurable as either input or output with an exclusive web interface that allows control from any computer connected to the network and with advanced tools for day to day studio production. The system supports playout and recording of files with most popular codecs, wrappers and editing tools for team collaboration and multi-user operation.

With a standard SSD storage of 1TB upgradeable up to 4TB it provides up to 150 hours of 50Mbit material. The system supports XDCAM, ProRes and DNxHD file formats with either MOV or MXF wrappers. A physical remote control - sold separately - can be attached to any network client for operating the unit or doing sub-clip editing.

Insight C2 and C4 offer wide system integration providing standard connection with FOR-A Hanabi switchers, network VDCP, AMP and FOR-A's GearLink control system. Files can be accessed and ingested through SMB and FTP plus HTTP media download.

Insight's web interface also allows alternative views with filtered channels and touch oriented interface for channel monitoring and operation, plus shotbox for host operation on studio.

-  **Storage options**  
1TB dedicated storage  
Upgradable up to 4TB
-  **Supported resolutions**  
NTSC - PAL - HD 720P (23.98/24/25/29.97/30)  
HD 1080i (23.98/24/25/29.97/30)
-  **Supported codecs**  
MPEG-2 | XDCAM | DNxHD | Apple ProRes
-  **Input / Output**  
C2: 2 channels with dedicated SDI connectors  
C4: 4 channels with reconfigurable SDI connectors  
C4+: 4 channels with dedicated SDI connectors
