FA-9600
Ver.5.30

FOR.A[®]

SR Live
for HDR

12G/6G/3G/HD/SD
Multi-Purpose Signal Processor
FA-9600
Ver.5.30

Provides HDR and Wide Color Gamut support. Offers exceptional conversion format delivery, including 12G, 4K(UHD), 1080p and HD/SD.

Each of the FA-9600 processor's 2 HD/SD inputs includes a frame synchronizer. Because the signal processor features 12G-SDI terminals, optional software opens the door to 4K(UHD) production. Adding an optional expansion card provides 4 more channels of 3G-SDI input/output or 6 channels of 12G-SDI distributed output.*1

The FA-9600 can be expanded with optional cards*1 that make it an ideal standalone solution at transmission centers, in mobile production trucks, production studios, news stations, and other nonlinear editing and layout production environments. *1 For details, see the expansion cards in "Options."

Provides versatile format support in transmission centers

- All FA-9600 functions can be controlled via an intuitive Web-based GUI.

Optional features

Video

- With the optional FA-964K, process 4K and HD video simultaneously. One of the FA-9600's internal paths can be used for 4K and the other for HD signals. (see P. 4, 9)
- With the FA-96UDC option, use up/down/cross/aspect conversion, interlace/progressive conversion, 2SI/SQD conversion, 3G-SDI Level-A/B conversion. (see P. 5, 6, 7, 9)
- Quad 3G-SDI I/O card or 12G-SDI distribution output card, or SFP/SFP+ modular card can be installed. (see P. 8)
- For HDR function, 3D-LUT conversion 1 and SR Live for HDR (OOTF) function max.2 can be added. (see P. 9)
"SR Live for HDR" is the solution which enables simultaneous and efficient HDR / SDR content production, proposed by Sony Corporation.

Audio

- AES/EBU I/O card, analog audio I/O card, MADI interface card, or Dante® interface card can be added. (see P. 8)
Dante is a registered trademark of Audinate Pty Ltd.

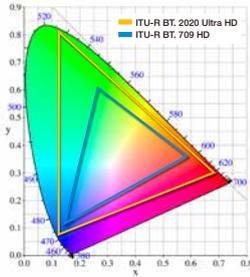

Other features

- Optional remote control unit connection.
- Redundant power supply, GPI I/O, and LTC I/O can be added.

Advantages in mixed HDR/SDR environments

New color processing circuit provides HD/4K (UHD) production support. This is useful when converting to unified specifications before input to a switcher or editing system and at output - prior to HDR and SDR simulcasts. The FA-9600's strong color correction capability makes it ideal for video wall applications.

- Supports and converts between the broad ITU-R BT.2020 gamut for 4K/8K and the conventional ITU-R BT.709 gamut in HD.

ITU-R BT.709 FA-9600 ITU-R BT.2020

- Compensates for differences among external devices using EOTF/OETF corresponding to various HDR or SDR curves.
- Supports HDR metadata input/output via HDMI.
- EOTF/OETF log curves and gamut can be registered from a PC. Also compatible with S-Log3, Canon Log 3, and other camera log curves.
- Dynamic range conversion compatible with HLG, PQ, SDR, and other log curves. Compatible with ITU-R BT.2100-compliant dynamic range conversion.
- Using the FA-96AHDR2 advanced function software option, the processor is conversion compatible with SR Live for HDR and the OOTF adjustment function. Also, conversion using 3D-LUT is possible by simply changing the mode. The FA-9600 can control 3D-LUT in real-time with WonderLookPro. (TVLogic)³
- LUT Converter included – a Windows tool to convert 3D LUT data, created so that non-linear and other software can convert FOR-A LUT (3D LUT) data for import to the FA-9600.
- Runs optimum color correction automatically with Payload ID information.

³ WonderLookPro (V4.3.5 or later) and WonderLookPro Corporate License are required.
